

Introduction to the National Arithmetic

Filesize: 6.99 MB

Reviews

Very helpful to any or all category of folks. It is written in simple phrases rather than difficult to understand. It has been developed in an exceptionally simple way and is particularly just after I finished reading this pdf in which it basically transformed me, modified the way in my opinion.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1851 Excerpt: .who received \$750; required the whole estate. Ans. 812,000. XX. DECIMAL FRACTIONS. Art. 173. A Decimal Fraction is a fraction whose denominator is 10, 100, 1000, c. Art. 174. Decimal fractions are commonly expressed by writing the numerator only with a point before it, called the decimal point or separatrix; thus, .9 is written and read .9 tenths. x . 99 hundredths., \$. 999 thousandths. Art. 175. By examining the foregoing fractions, it will be seen that .9 can occupy only one place while it remains a proper fraction; .99, only two places; and .999, only three places; for, if their numerators are increased by .1, .01, .001, respectively, each fraction becomes a unit or whole number. Hence, The first figure or place of any decimal on the right of the point is tenths, the second hundredths, the third thousandths, &c. Note.--When a decimal place has no significant figure, it must be filled with a cipher. Art. 176. The denominator of .9 is 1 with one cipher annexed; the denominator of .99 is 1 with two ciphers annexed; the denominator of .999 is 1 with three ciphers annexed. Hence, The denominator of a decimal fraction is 1 with as many ciphers annexed as the numerator has places. Art. 177. Decimal fractions originate from dividing the unit, first, into 10 equal parts, and then each of these parts into 10 other equal parts, and so on indefinitely. Thus, $1 - \frac{1}{10} = \frac{9}{10}$; $\frac{1}{10} - \frac{1}{100} = \frac{9}{100}$; &c.
