CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2013. Paperback. Condition: New. Language: English . Brand New Book. Pain is one of the most common symptoms of neurological disease and its appropriate management is essential to the effective care of patients. Neurological disorders differ in their specific pain phenotype, mechanisms and therapy. Case Studies in Neurological Pain addresses the specific pain issues, treatment and pathophysiology in patients with a wide spectrum of neurological disease. Clinical case studies have long been recognized as a useful adjunct to problem-based learning and continuing professional development. They emphasize the need for clinical reasoning, integrative thinking, problem-solving, communication, teamwork and self-directed learning - all desirable generic skills for health care professionals. Presenting real-life cases - covering conditions including diabetic and idiopathic polyneuropathies, focal neuropathies, multiple sclerosis and headache disorders - this book provides neurologists, neurosurgeons, pain clinic specialists and primary care physicians with an understanding of problems encountered in neurological practice. There are also chapters on mechanisms of neurological pain and new treatment guidelines.
